The Healing  
Power  
of

*Home*

**It's a place of peace, joy,  
memories and...  
it's a place of healing.**

**M**edical professionals and their patients are finding that serious injury or illness doesn't have to mean a long stay in a hospital room, where the world seems no larger than four sterile walls.

**H**ome Care helps make your world a little bigger. You don't have to miss seeing the birds feeding outside your window, or children playing across the street. And there are no set visiting hours, so family and friends can be with you at any time of the day or night.

**W**hether you or a loved one needs skilled physician-directed care, rehabilitation services, or assistance with personal care, HomeCall can help you bring the healthcare services you need to your own home.

**W**ith HomeCall, patients and their families get the best of both worlds... high-tech medical care (with daily monitoring of vital signs) and the comfort of their own homes.

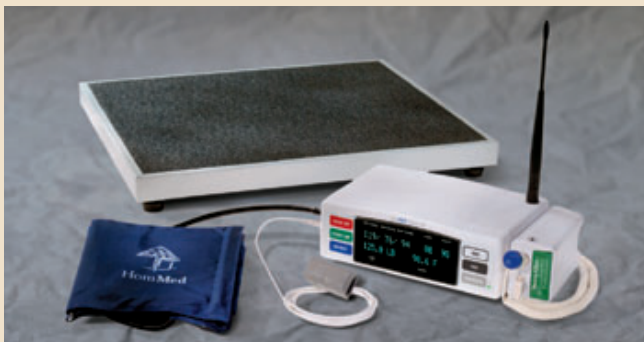

## HomeCall of Stillwater Inc.,

was started in 1978 by area residents who wanted to provide an alternative to premature institutionalization for the elderly and disabled in Stillwater and the surrounding area.

Since then, the Oklahoma-owned agency has expanded its coverage to Payne, Noble, Kay and Pawnee counties with offices in Stillwater and Ponca City.

HomeCall has partnered with HomMed to utilize the most current technology and provide a new standard of home care with daily monitoring of vital signs. HomeCall places the Sentry III monitor in the patient's home and provides the physician with trend reports of blood pressure, heart rate, blood oxygen level, weight and even blood sugar level and temperature, if needed.

HomeCall's full range of services include:

- Skilled Nursing
- Home Health Aide Services
- Physical, Occupational and Speech Therapy
- Rehabilitational Services
- Medical Social Services
- Case Management

The RN Case Manager plans, coordinates and supervises all services provided to the patient. The case manager assists the patient and his/her informal support system in restoring the patient to the highest functional level possible.

## Only the best will do.

Specific hiring standards and continuing education requirements are combined with a virtually nonexistent turnover in professional staff at HomeCall. That means that when you choose HomeCall, you're getting the best from caregivers you come to know and trust.

HomeCall's skilled and caring staff are highly trained, closely supervised, bonded, and insured. All services are case managed by R.N.'s. Other caregivers include rehabilitation specialists, social workers, and home-care aides.

Continuing education is important at HomeCall, and all employees must meet standards that exceed any state or federal requirement. We hire the best and do our best to keep them that way.

## The choice is yours.

Few choices are as important as choosing a healthcare provider. That's especially true when it's home health because caregivers work closely with the patients and the family. If you or a loved one needs home health, do your homework. Compare qualifications and standards of care to find the best provider for you.

HomeCall is guided by a Code of Ethics and committed to providing high-quality, cost-effective, care to Oklahoma residents. Care is taken to not overuse or abuse the systems that provide reimbursement for the services.

HomeCall is a state licensed, Medicare Certified agency. Services may be covered by Medicare, Medicaid, private insurance, worker's compensation, or private pay.

Get the facts.

Then call the best.

# It's your call,

# Make it HomeCall.
